

REMARKS

Claims 1-7 are pending in the application. Claims 1-3 are being amended. Amendments to claims 1 and 2 are based on language of claim 3. Amendments to the drawings and the specification are based on the language in Para 21 which states "After the conversion, data are transmitted to a buffers controller 203, which consists of a decoding controller 203a, buffers 203b and a displaying controller 203c. The buffer controller 203 controls writing of the data in the buffers 203b, reading of the data from the buffers 203b and transmitting the data form the buffers 203b to a video coder 204, which transforms the digital signal into an analogue signal, which is next transmitted to a receiver 205, for example a television set." as well on the language in Para 24 which states "When the controller detects such signal, the procedure moves to step 404, where a check is made, whether the buffer, next in relation to the current buffer of the decoder, is being displayed. This prevents the overwriting of the data composing the currently displayed video frame. If it is not displayed, the current decoder buffer, to which the data will be written, is set in step 405 to the next buffer and the procedure moves to step 406. In the opposite case, when the next buffer is being displayed, there is a direct shift to step 406, where - after detecting the signal of the top vertical synchronization in the analogue input signal data - decoding to the current decoder buffer the takes place." Thus, each buffer can be a current buffer, each buffer can have an input and an output.

Priority under 35 U.S.C. § 119

Applicant notes that the Examiner acknowledged a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f) to Polish Patent Application No. P-362631 filed October 6, 2003 and confirmed that all certified copies of the priority documents have been received.

All outstanding requirements will now be addressed in the order they appear in the Office Action mailed April 30, 2007.

1. The title of the invention according to the Office Action is allegedly not descriptive. Applicant has changed the title to RECEIVER OF ANALOGUE VIDEO SIGNAL HAVING MEANS FOR ANALOGUE VIDEO SIGNAL CONVERSION AND METHOD FOR CONTROL OF DISPLAY OF VIDEO FRAMES. Applicant respectfully requests withdrawal of the title objection.

2-3. The abstract of the disclosure is objected to because it allegedly does not inform the reader in any way that the inventive feature centers around a multiple frame buffer arrangement. Applicant has prepared a new version of the abstract obviating Examiner's objection. Applicant respectfully request withdrawal of the abstract objection.

4. Fig. 6 of the drawing does not include an input or an output to the system. Applicant has amended the Fig. 6 to obviate the Examiner's objection by adding the input and the output that allow the buffers to communicate with the system. Applicant respectfully requests withdrawal of the drawing objection.

5. Claims 2-5 are objected to because Applicant probably intended to end claim 2 with the word “format”. Applicant has added the word “format” at the end of claim 2 6 to obviate the Examiner’s objection. Applicant respectfully requests withdrawal of the claim objection.

6. Claims 1 and 2 stand rejected under 35 U.S.C. 102 as being allegedly anticipated by Yanai et al. Applicant has amended claims 1-2 by adding a feature of claim 3 that frame buffers are organized as a two-way list, which was not known from the prior art. Applicant respectfully requests withdrawal of this rejection with respect to the claims as amended.

8. Applicant notes with appreciation that the Examiner considers the claimed subject matter of claims 3-7 to be allowable over the prior art. Applicant respectfully submits that claims 1-3 have been amended to overcome the Examiner’s objections and rejection(s) under 35 U.S.C. 102.

CONCLUSION

In view of the foregoing amendments and remarks, Applicant submits that the pending claims are in condition for allowance. Early and favorable reconsideration is respectfully solicited. Should an extension of time be required, Applicant hereby petitions for same and requests that the extension fee and any other fee required for timely consideration of this submission be charged to **Deposit Account No. 503182**.

Customer Number: **33,794**

Date: July 16, 2007

Respectfully Submitted,

/Matthias Scholl/
